EXECUTIVE SUMMARY

Data Scientist and NLP Specialist with strong background in statistical modeling, enterprise SQL warehousing, and transformer-based text analytics. Experienced in production sentiment analysis and customer intent classification.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Scala

Frameworks: Scikit-Learn, Hugging Face, PyTorch (Basics), Pandas, NumPy

ML Ai: NLP, Transformers, BERT, Text Summarization, Topic Modeling, Machine Learning

Databases: PostgreSQL, Snowflake, BigQuery

Cloud: AWS (Redshift, S3)

Tools: Git, Tableau, Airflow, Jupyter

PROFESSIONAL EXPERIENCE

Data Scientist - NLP — CloudAnalytics Corp (*Aug 2023 – Present (1 yr 1 mo)*)

- Trained and deployed transformer models (RoBERTa) for multi-class customer support ticket classification with 93% F1 score.
- Designed large-scale data transformation workflows in PostgreSQL and Snowflake handling 5M+ records weekly.
- Conducted A/B testing on model-driven routing, cutting average resolution time by 28%.

KEY PROJECTS

Enterprise NLP Sentiment & Intent Pipeline (Tech: Python, Hugging Face, PyTorch, SQL, FastAPI)

Architected an end-to-end NLP pipeline analyzing streaming customer feedback and categorizing urgency levels in real time.

Predictive Customer Churn Engine (Tech: Python, Scikit-Learn, SQL, Pandas)

Constructed churn prediction model using LightGBM and Random Forests with SHAP interpretability values.

EDUCATION

M.S. in Data Science, University of Washington (2023)

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty — Amazon Web Services (2024)
